

## Computer Systems Integrators, Inc.

Computer Systems Integrators, Inc. (CSI) specializes in the design, configuration and implementation of local and wide area network (LAN/WAN) solutions.

We bring to each project insights and knowledge that has been gained from our over 28 years of working in the Information Technology industry.

CSI assists in the design, implementation and support of our client's technology programs. Our clients range from small single building entities to large county based systems interconnected by wide-area network connections.

At CSI, we do not simply install your equipment and then walk away. As a detail oriented company, our mission is to build a long-term relationship with our clients as we assist them in solving their technology needs.
